

Memo Story

In the morning, you get up well sustained, have a full breakfast and feel fit.

For your day need competences, bag is packed and thoughts are free.

You take a quick go to the toilet, and then way through community.

On the way, you think by yourself:

"Awesome", and: How does the energy work clean?

How are all of these things with work, reserves and infrastructure kept in balance?

What all, in all of the settlements with cycles and waste, does have a function?

In the afternoon, you enjoy the sunny air, a swim in the water and the shade under a firmly rooted tree.

In the evening, you think: Wow, what values indeed are solid law and fair exchange.

Global_Citizenship Concept: Realizing human rights, being a bearer of rights.
